Individual tests

10 Analytics

Every page in this website is using some form of analytics software.

This is excellent and should allow for a complete analysis of visitor behaviour.

10 Headings

All pages were found to use correctly defined headings.

This is a crucial step towards optimising this website for search engines, and ensuring accessibility for users with disabilities.

You can review all headings in use below - if this site is particularly concerned with search engine optimisation, these headings should be chosen carefully.

Some headings (0.1%) were found to be empty, or incorrectly defined. Empty or invalid headings are of no value to search engines and make a website less accessible.

Possible misspelt words

MacLead.

This test looks for words it does not recognise in the visible and invisible text on a webpage: meta descriptions, page titles and alternative text are all checked. Spell checking is case-sensitive; for example 'David' is correctly spelt, but 'david' is not.

9.8 Freshness

This site appears to have been updated recently (today). On average, this site appears to be updated every 4 days.

Up-to-date content creates a positive impression of a website and gives visitors more reason to visit often.

This analysis is an estimate, based on dates mentioned within the website - the same dates that real visitors will see, such as article dates and blog comments. Only the appearance of up-to-date content is considered, not images or page designs.

Contact details

6 different email addresses were found in this website. One unique phone number was found in this website.

No postal addresses were found in this website.

Because these contact details were detected automatically by software, it is possible some other details have not been identified. This test can only find contact details written in the text of pages, not those inside images.

Check all contact details (6 emails, 1 phone number) are correct.

Consider whether email addresses should be listed on your website, as they will be much more susceptible to spam.
